

# Delphos Edition

## August 2022

“Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him” (1 Corinthians 2:9 KJV). I am gloriously celebrating the new images NASA just released. A new day has arrived of peering into the deep cosmos. The Webb telescope has released scientific images never before seen. This colossal telescope orbits around 1 million miles from Earth. The first images include a star nursery, colossal cosmic clouds and distant galaxies and a giant planet beyond our solar system. Webb also gave us a closer look at the Southern Ring Nebula, some 2,000 light years away; also called “**God’s eye**”. God made this amazing universe and hung every star in place. Oh what a mighty Creator we serve. He has so much for us that we do not even know about yet. Nasa astronomer Michelle Thaller said, "This is only the beginning. The best is yet to come." Indeed, it is! Great things He has done! What a mighty God we serve. Amen.
